DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claims must be in one sentence form only. Note the format of the claims in the patent(s) cited.

ART REJECTION:

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Gelvin et al(6,735,630).

-- In considering claims 1-9, the claimed subject matter that is met by Gelvin et al(Gelvin) includes:

Art Unit: 2612

REMARKS:

4. The interpretation of the claims and the above stated art rejection has been made to the best of the examiner's ability in lieu of existing 112 problems concerning the specification and claims. The examiner deems that the applicant has not made a bona fide attempt to correct the problems as stated in the previous office actions, and therefore has issued the above stated art rejection.

A complete, response to this office action including all requested corrections based on the guidelines as recited in the office action of 8/17/2006 is expected upon submission of the next formal response.
